## Appendix 2

It was the usual Saturday. It is a day, when you can take a break from school, go for a walk with friends, watch TV, listen to your favorite music without thinking about classes and lessons.

Alex woke up a little earlier than usual, he got out of bed and went to the bathroom. After washing, Alex went into the kitchen. Every morning, while he was having a breakfast, the boy was watching TV, he was very interested in the news and never missed a morning broadcast. He sat on a chair and looked through the kitchen. To his surprise, a television, which typically stood on a table, now disappeared!

"Where is it?" Alex thought. "It always been here!"

He did not know what to do. Alex walked around the kitchen and noticed that the touch screen of the refrigerator did not show the date and time. And there was only a faint trace on the wall, where was hanging a radio yesterday. The boy thought that his parents decided to buy a new TV and a new radio. His mother worked in a hospital and today it was her night shift. So Alex decided to wait when his dad wake up and to ask him. The boy was drinking a tea when he heard footsteps in the corridor. Dad entered the kitchen. He looked at TV's empty place. Finally, he said to his son:

"My laptop has disappeared too."

"Maybe we were robbed?" Alex suggested. "Let's call the police!"

"Come on!" said dad.

They went to the bedroom together. The phone was on the nightstand on its place. Dad picked up the phone and dialed the number of the police. He raised phone to his ear and froze.

"It is strange!" he said. "There is no dial tone."

He dialed the number again and again but he did not hear the dial tone in the handset. This procedure was repeated several times, but there was not any result. Father sighed and put the phone on its place.

"Son, let 's ask the neighbors." Dad suggested .

A minute later, they were standing in front of mister Brown`s door. Dad rang the doorbell. Alex noticed that the red light of alarm did not light. Soon, they heard footsteps behind the door. Mister Brown opened the door. The expression of his face told guests that something was wrong. Mister Brown began to speak without a greeting :

"Almost all electronic devices have disappeared from my flat! Last evening I watched a movie on DVD and I worked with computer, and today I woke up and did not find these things! How can it be?"

- We have the same situa...

Dad did not finish the sentence. Another neighbor opened the door. After it another door was opened... Soon our porch was full of voices. There were surprised people on the stairs. They shared to each other incredible news. Alex heard someone from the crowd said :

- But it is impossible!

## Appendix 5

	When did you start using a computer? (the average value, age)	When did you start surfing the internet? (the average value, age)	Hours per day in front of a monitor. (average value, hours/minutes)
Male	7 years	9 years	4 hours
Female	9 years	11 years	2-3 hours
The general result	7 years	8 years	2-5 hours

The table was made by me.
